Troubleshooting with the Application Process

If the application page is not allowing for *Save and Continue* please check the following:

- Are you using the proper browser? Chrome is preferred, Internet Explorer (IE) is acceptable.
- Are you using a desk top or a lap top computer? This process is not guaranteed to work with any mobile devices.
- All the fields (blanks or boxes) must be entered into. If it calls for letters or numbers; use letters or numbers only. Special characters will cause the page to stall. The field should be highlighted in red if there is an error.

When conditions are requested, please refrain from uploading a document several times. You will only see the last upload to a category. Processors/underwriters are able to view *all* uploads. Duplicate uploads will delay processing of the application. Notification is sent to an email address to notify us of each of your upload.

The application is only *Submitted* one time per property address. Once the correct documents are uploaded to all of the categories the *Submit* button will be activated. When asked for further documentation to be uploaded you will not need to *Submit* the application again. The documents are uploaded to the application if you receive the successful notification.
